

A girl laughed when the teacher wrote a wrong answer on the board.

But **never expected** him to do this next.

One day a **school teacher**
wrote the following on a
board:

$$9 \times 1 = 9$$

$$9 \times 6 = 54$$

$$9 \times 2 = 18$$

$$9 \times 7 = 63$$

$$9 \times 3 = 27$$

$$9 \times 8 = 72$$

$$9 \times 4 = 36$$

$$9 \times 9 = 81$$

$$9 \times 5 = 45$$

$$9 \times 10 = 90$$

When he was done, he looked to the students and they were all **laughing at him**, because of the first equation which was wrong, and then the teacher **said the following:**

I wrote that first one wrong on purpose, because I wanted you to **learn something important.**

This was for you to know
how the world out there **will**
treat you.

You can see that **I wrote**
right 9 times, but none of
you congratulated me for it;

You all laughed and criticized me because of **one wrong thing** I did. So this is the lesson...

The world will **never appreciate** the good you do a million times,

but will **criticize** the one
wrong thing you do...

But don't get **discouraged,**

Always rise above all the
laughter and criticism.

STAY STRONG!

Believe in your heart and soul that you are capable of big things in your life.

The only thing that is standing in your way is yourself.

Remove your glass ceiling.

Type **YES** if you agree.
